

Regional Social Development Committee(RSDC) Project

"Preparation and Advocacy of Poverty Maps: Towards Poverty Alleviation and Autonomy"

Collaboration of the RSDC-Technical Working Group
Data collected by DOH-CAR, DILG-CAR, DepEd-CAR & POPCOM-CAR
Data processing and maps prepared by NSCB-CAR

HOW TO READ THE MAPS

The barangay indices are plotted using GIS tools and technology. Maps are made for the individual indicators, the composite indices and the over-all poverty index.

Seven intervals are used in the maps. Three intervals with ranges 0-33.9 percent (best) , 34-66.9 percent (better) and 67-99.9 percent (good) represent the performance of the barangays whose achievements are better than the average municipal values. The 100-133.9 percent range would include the barangays with performance at least equal to but not more than one-and-a-half times the municipal value. Similarly, the 134-166.9 percent (bad), 167-199.9 percent (worse) and 200 percent and over (worst) ranges would indicate the barangays that are above the municipal average.

LEGEND	
RANGE	RATING
 0 - 33.9	Best
 34 - 66.9	Better
 67 - 99.9	Good
 100 - 133.9	Average
 134 - 166.9	Bad
 167 - 199.9	Worse
 200 and above	Worst
 No data	
Municipality = 100	

The poverty maps applied a **red to green color scheme**. This is to better distinguish the difference between the barangays and readily identify barangays that need intervention. Having seven intervals, the three classes are in the shades of red, three are in the shades of green and one that is in the **middle uses the shade of light yellow**. The **white** color is used to portray an area without and/or missing data.

The three intervals of 0-33.9 percent, 34-66.9 percent and 67-99.9 percent use the shades of green, using a darker shade of green for 0-33.9 percent, a lighter shade of green for 34-66.9 percent and the lightest shade of green for the 67-99.9 percent interval. Thus, a **darker shade of green** portrays the **best situation** as compared to the other barangays of the municipality. The **light yellow** shade is portrayed with the values 100-133.9 percent. This range is within the municipal index of 100, meaning indices less than 100 percent indicates a better situation than the overall performance of the municipality. Those indices that have a higher value than 100 percent indicate a worse situation than the municipal performance. Three intervals are used for this, the 134-166.9 percent, the 167-199.9 percent and the 200 percent and over interval. The first two intervals use **lighter shades of red** to portray the alarming performance of the barangays. The **darkest red or maroon** shade is used for the 200 percent and above interval so that it would give the viewer an instant picture of which area has an alarming situation or has the **worst situation** among the barangays within the municipality.

MBN 2004 & 2007 Data Gathered

Survival

- Food and Nutrition
 - Malnourished Children 0-6 Years Old
 - Moderate & Severely Underweight Children 0-6 Years Old
- Health
 - Child Deaths
 - Infant Deaths
 - Fully Immunized Children
 - Population to Health Worker Ratio
- Water and Sanitation
 - HH w/o Access to Safe Water
 - HH w/o Access to Sanitary Toilet

Enabling

- Basic education
 - Elementary Drop-outs
 - High School Drop-outs

Security

- Peace and Order
 - Crime Against Person
 - Crime Against Property
